Course Catalogue
(κατάλογος μαθημάτων)

«The Course Catalogue includes detailed, user-friendly and up-to-date information on the institution's learning environment that should be available to students before entering and throughout their studies to enable them to make the right choices and use their time most efficiently. The information concerns, for example, the qualifications offered, the learning, teaching and assessment procedures, the level of programmes, the individual educational components and the learning resources.

The Course Catalogue should include the names of people to contact, with information about how, when and where to contact them.

The Course Catalogue should be published on the institution's website, indicating the course/subject titles in the national language … and in English, so that all interested parties can easily access it. It should be published sufficiently in advance for prospective students to make their choices. The institution is free to decide the format of the Catalogue, …. However, following a common structure as set out below makes Course Catalogues more easily comparable and improves transparency. In any case, the Course Catalogue should include general information on the institution, its resources and services, as well as academic information on its programmes and individual educational components.…»
